BOUW EEN TIJGER!

PAGINA 1

Tijgers behoren tot de mooiste dieren ter wereld! Ze leven in Azië en kunnen wel 2,5 meter lang worden en 270 kg wegen! De tijger is een beschermde diersoort en er zijn er nog maar zo'n 2000 in het wild. Hopelijk helpen de beschermingsmaatregelen, zoals die in India en Rusland worden genomen, om dit aantal te doen groeien!

Je kan deze tijger zelf bouwen met stenen uit je LEGO verzameling.
